👤 About

I am a passionate and creative full-stack software engineer based in India, aiming on crafting great-looking software products. I focus on details, accessibility and writing maintainable code.

I consider myself a proactive worker and learner, being able to work with a team, under the terms of respect and support, and helping build diverse, inclusive and safe and sound workplaces. I am always eager for challenges where I can gain new skills or improve the existent ones.

💻 Experience

Full Stack Developer @ One Oath Foundation, West Bengal, India

July 2023 ~ present – Intern

- Developing features and building microservices and user interface components for a client's personality development system
- Refactored an Web app to a modern codebase, aiming to make it more user friendly and flexible by showcasing content from a CMS.

Web Developer @ AAA Intergalactic – Infrastructure, Cameroon, Africa

April 2023 ~ June 2023 – Intern

- Developed features and built static website for client and microservices to operate those websites.
- Had the responsibility of taking decisions on architecture planning, UI design and feature development.
